

Juan Esteban Restrepo Ossa

Cloud Infrastructure Lead | Cloud Infrastructure Engineer | Cybersecurity

3122117407 | esteban.restrepo.11@gmail.com | Envigado, Antioquia | English B1

PROFESSIONAL SUMMARY

Systems Engineer with B1 English proficiency and 9 years of experience leading the administration of Cloud and On-Premises Infrastructure, specializing in Cybersecurity, Linux and Windows platforms, AWS, Azure, VMware, virtualization, and infrastructure automation. Experienced in designing, implementing, and optimizing high-availability solutions, network administration, firewalls, Active Directory, Microsoft 365, Docker, Infrastructure as Code (IaC), monitoring, vulnerability management, business continuity, and ITIL best practices. Knowledge of backend and frontend development using JavaScript, PHP, Node.js, Vue.js, and React. Results-oriented professional focused on digital transformation, continuous improvement, and technical leadership.

PROFESSIONAL EXPERIENCE

CLOUD & ON-PREMISES INFRASTRUCTURE LEAD

Psicol S.A.S. | Medellín | IT Services | July 2022 – June 2026

Key Achievements:

- Led the administration of Cloud and On-Premises infrastructure across Linux, Windows, AWS, and VMware environments, supporting 8 IT projects, managing 10+ servers, and maintaining 99.9% service availability for critical business systems.
- Strengthened the organization's cybersecurity posture through hardening, vulnerability management, SIEM, XDR, corporate firewalls, and network segmentation, remediating 50+ critical/high vulnerabilities and 80 medium/low vulnerabilities, significantly reducing the attack surface.
- Automated infrastructure processes using Infrastructure as Code (IaC) and automation tools, reducing deployment times by 15% and operational errors by 20%.
- Designed and implemented centralized monitoring with Grafana for 10+ servers and 50 critical applications, improving observability and reducing incident detection time by 15%.
- Administered Microsoft 365 and Active Directory for 40+ users, managing Exchange Online, Group Policy (GPO), licensing, and Multi-Factor Authentication (MFA), strengthening identity and access management.
- Managed network infrastructure by implementing 80+ firewall rules, 20 VPN tunnels, and network segmentation policies, enhancing perimeter security and secure communications across corporate sites.
- Implemented backup and disaster recovery strategies using NAS storage with more than 15 TB of capacity, ensuring data protection, availability, and recovery of critical information.
- Managed Development, QA, and Production environments supporting 50+ business applications, including deployments on Apache, Nginx, Docker, and Docker Compose, database optimization, and REST API integrations, ensuring platform stability and business continuity.
- Led two Cloud migration projects, improving infrastructure scalability, availability, and reducing service downtime.
- Coordinated infrastructure and telecommunications vendors, ensuring SLA compliance, service continuity, and successful execution of technology projects.
- Managed critical incidents following ITIL best practices, conducting Root Cause Analysis (RCA) and reducing recurring infrastructure failures.

SYSTEMS ADMINISTRATOR (IT INFRASTRUCTURE & VIRTUALIZATION)

Vehículos del camino | Medellín | Automotive Industry | November 2017 – July 2022

Key Achievements:

- Administered IT infrastructure consisting of 8 physical and virtual servers across Windows Server, VMware, and Hyper-V environments, ensuring high availability and operational continuity.
- Managed relational databases, optimizing SQL queries and processes to improve the stability and performance of business-critical applications used by 200+ users.
- Administered Active Directory, DNS, and DHCP services for 200+ users and 200+ endpoints, strengthening centralized identity management and network availability.
- Managed LAN/WAN infrastructure and perimeter security, implementing network configurations and access policies that ensured secure connectivity between corporate sites.
- Implemented security policies and managed enterprise antivirus protection across 200+ endpoints, reducing malware-related incidents and strengthening endpoint security.
- Participated in security audits and vulnerability management initiatives, contributing to the identification and remediation of 20+ security findings, improving compliance with corporate security policies.
- Automated administrative and operational tasks using PowerShell, reducing execution times by approximately 15% and improving operational efficiency.
- Delivered Level 2 infrastructure support, managing incidents and service requests under ITIL best practices, contributing to SLA compliance and service quality.
- Executed server and database backup and recovery activities, supporting business continuity and protecting critical corporate information.

TECHNICAL SKILLS

- **Cloud:** AWS, Azure.
- **Virtualization:** VMware, Hyper-V.
- **Infrastructure:** Linux, Windows Server, Docker, Docker Compose, Apache, Nginx, Active Directory, Microsoft 365.
- **Networking & Cybersecurity:** Firewalls, VPN, LAN/WAN, DNS, DHCP, SSL/TLS, Hardening, SIEM, XDR, Vulnerability Management.
- **Automation:** PowerShell, Bash, IaC.
- **Monitoring:** Grafana.
- **Databases:** MySQL, MariaDB.
- **Development:** API REST, Git, JavaScript, PHP, Node.js, Vue.js, React.
- **Methodologies:** ITIL, Root Cause Analysis (RCA), Incident Management, Change Management.

EDUCATION

- Bachelor's Degree in Systems Engineering | Institución Universitaria de Envigado | Envigado, Antioquia | 2025
- Technical Diploma in Computer Analysis and Programming | CENSA | Medellín, Antioquia | 2018

TRAINING & PROFESSIONAL DEVELOPMENT

- AWS Certified Solutions Architect – Associate | Udemy | 2025
- Introduction to Cybersecurity | Cisco Networking Academy | 2023
- React Native: Fundamentals & Practice | Platzi | 2024
- JavaScript: Fundamentals & Practice | Platzi | 2023
