

JUAN ESTEBAN RESTREPO OSSA

PROFESSIONAL SUMMARY

Systems Engineer and Software Developer with a solid track record in web and mobile application development, complemented by over 9 years of experience in Cloud infrastructure, Linux/Windows servers, and cybersecurity. Proficient in Full-stack development using Node.js, PHP (Laravel), JavaScript, Vue.js, React, and React Native. Skilled in software architecture, REST API integration and consumption, relational database optimization (MySQL, MariaDB), and containerization with Docker. Leveraging a strong background in infrastructure, I provide an end-to-end perspective on the Software Development Life Cycle (SDLC), ensuring scalable, secure, and production-ready code.

FEATURED PROJECTS

Inventory, Purchasing, and Sales Management System (CVI) | Fullstack

Web application for end-to-end management of inventory, purchasing, and sales. Implemented user authentication, CRUD operations, supplier/client modules, business rules, and centralized report generation.

Music Social Network | Fullstack

Interactive social platform designed for music enthusiasts. Built a modern responsive interface supporting post management, artist discovery, and real-time social interaction.

Pokémon API Client | Mobile (React Native)

Mobile application built with React Native to consume PokeAPI data via HTTP requests. Handled dynamic JSON response parsing and mobile UI component rendering.

Professional Web Portfolio (Vue.js): <https://resume-jero.vercel.app/>

PROFESSIONAL EXPERIENCE

Infrastructure Lead – Psicol S.A.S.

07/2022 – 06/2026

- Contributed to the development and evolution of enterprise web applications using PHP (Laravel), JavaScript, and MySQL/MariaDB, implementing business logic, CRUD modules, and REST API integrations.
- Managed and configured Development, QA, and Production environments for over 50 applications, driving continuous deployments on Linux servers using Docker, Docker Compose, Nginx, and Apache.
- Automated infrastructure workflows and processes via IaC and scripting, reducing deployment times by 15% and operational errors by 20%.
- Designed and deployed centralized monitoring using Grafana across 50+ applications and 10 servers, cutting incident detection time by 15%.
- Led the administration of Cloud (AWS) and On-Premise infrastructure, maintaining over 99.9% uptime for critical services.
- Enhanced application and server cybersecurity (SSL/TLS certificates, system hardening, vulnerability management), resolving over 130 security findings in web environments.

LANGUAGES

Spanish: Native

English: B1 (Intermediate)

TECHNICAL SKILLS

• Languages & Frameworks:

JavaScript, PHP (Laravel), Node.js, Vue.js, React, React Native, HTML5, CSS3.

• Databases & APIs:

MySQL, MariaDB, API REST, JSON, Optimización SQL.

• DevOps & Tools:

Git, GitHub, Docker, Docker Compose, Nginx, Apache, IaC, Bash, PowerShell, Grafana.

• Cloud & OS:

AWS, Azure, Linux (Ubuntu/Debian/CenOS), Windows Server.

- Managed and optimized relational database queries, improving performance and system stability for enterprise applications serving over 200 users.
- Automated operational and administrative tasks using PowerShell scripting, decreasing execution time by 15%.
- Provided Tier-2 technical support for software and infrastructure platforms under ITIL methodologies, consistently meeting SLA targets.
- Administered Windows Server, VMware, and Hyper-V environments, participating in security management and data backup strategies.

EDUCATION

Bachelor's Degree in Systems Engineering – Institución Universitaria de Envigado, 2025

Technical Diploma in Computer Analysis and Programming – CENSA, 2018

COURSES AND CERTIFICATIONS

Agile Methodologies – Universidad Católica de Oriente (40 hours)

AWS Certified Solutions Architect – Associate – Udemy (30 hours)

Introduction to Cybersecurity – Cisco

Databases: Fundamentals and SQL – SENA (40 hours)

React Native (Basic and Practical) – Platzi (38 hours)

JavaScript (Basic and Practical) – Platzi (38 hours)

Software Development Quality – SENA (40 hours)

Databases: Fundamentals and SQL (DDL & DML) – SENA (40 hours)
